

Security & Azendoo

About us

Azendoo is a French company based in Bordeaux. Our Customer Success team is here to reply to all of your questions.

We know that you care a lot about how your personal and business data could be used or shared, which is why security and privacy are priorities for us.

Confidentiality of information and data partitioning are managed at various levels in Azendoo.

We meet the standards of the highest security requirements. Here are some key elements of our commitment to security and privacy.

Physical security and communication

- Audited Datacenter at the highest level of security, SAS70 Type II certified and ISO27001, SOC 1, SOC 2, SSAE16 soon PCI;
- Communications are encrypted using an AES-128 bit SSL certificate;
- 4-tier architecture, each layer being filtered by a dedicated firewall;
- Anti-break-in systems and strong authentication with dynamic RSA certificate;

Application security

- Access to user data is recorded
- User authorization and revocation mechanism
- Continuity plan and restoration plan are in place (max 5min data loss)

Security and data privacy

By contract, data remains your confidential property and will not be explored, nor retired, or exploited in any way. Data is hosted and maintained in Western Europe.

Data property

By contract the client retains ownership of the content and its use within the Azendoo platform

The Azendoo team cannot access or view the data content of its clients without prior written authorization from them.

We are here to help!

Ask us anything, share your feedback, or simply schedule a demo?
Our dedicated team is committed to the success of your teamwork.
